WELCOME

Thank you for getting in touch and considering Natalie Boyd Design House to help bring your project aspirations to life!

Design is our passion as much as it is our expertise, and I would love to discuss your project and guide you toward the services that will best suit you and your project.

In this introduction, you will discover detailed insights into our design services and an investment guide to help you envision the possibilities and understand the general costs involved.

We would love to work closely with you on this exciting journey. Please don't hesitate to ask any questions along the way.

We offer a range of design services that are customised to your needs.

Our design services alleviate all pressure, providing custom designs that culminate in exquisite end results.

01 - ARCHITECTURAL DESIGN - New Build or Renovation

We offer a complete end-to-end design journey; from initial concept development to detailed construction documentation, right through to installation coordination and final styling. Our approach is grounded in functionality, elevated by aesthetic, and the result is a thoughtfully curated home that feels as effortless as it is beautiful. Our greatest passion lies in collaborating seamlessly with you, alongside structural engineers and builders, to craft an outcome that is not only magnificent but deeply considered. Every decision is made with your priorities at the forefront; whether that's sustainability, budget, timeframes, or the realities of living through a renovation. From the experience of the journey to the quality of the final home, we place you at the heart of it all.

02 - FULL-SCOPE INTERIOR DESIGN

Our interior design services are

grounded in a deep knowledge of architecture and construction, ensuring every decision is both visionary and practical. We balance the artistry of interiors with the functionality of everyday living, creating spaces that feel as good as they look. From comprehensive documentation for trades and builders, to bespoke cabinetry for kitchens, bathrooms, and all wet areas, to curated furniture and finishes, every detail is meticulously resolved. The process is as considered as the outcome - crafted to deliver a home that is elevated, cohesive, and exquisitely executed, while remaining deeply connected to the way you live.

03 - LUXURY INTERIOR STYLING & FURNISHING

Our interior styling and furnishing service is designed for clients who value a truly elevated result without the complexity of managing it themselves. With projects starting from $250,000, we take care of every detail; from design and sourcing to procurement, delivery coordination, and installation. Furniture, art, lighting, rugs, and décor are curated with the same level of refinement and precision as our architectural work, ensuring each space feels cohesive, considered, and complete. The result is a seamless experience and a home that embodies effortless luxury, beautifully finished down to the last detail.

CLIENTS LOVE OUR PROJECT HUB!

Communication is the cornerstone of a successful project.

This is why, when you become a client of Natalie Boyd Design House, we create your personalised Project Hub.

Click here *for a sample of our platform for seamless communication and collaboration that empowers your vision every step of the way!*

INVESTMENT GUIDE

We design extraordinary homes and spaces from the ground up, and we also love to breathe new life into homes and boutique commercial settings through major renovations; transforming the design process into an inspiring and elevated journey. We will transform your dreams into a beautiful reality.

We are a client-driven studio, and no one project is the same; therefore you will receive a customised design proposal, scope of work, and tailored design fee for your project. The size, the requirements, the complexities of the design, project budget, amount of cabinetry design, custom design elements, location etc. will determine the final design fee. Below is a rough design fee guide from past projects, so please don't hesitate to chat to us about your unique and exciting project!

From the initial presentation – inspired by you and impeccably curated to satisfy both luxury and functionality – to the final installation of the last finishing touch, my team and I will be there to guide and inspire you so you can settle into a place of elevated comfort and style.*

A little bit about me

I'm Natalie, founder and creative director of Natalie Boyd Design House. We create lifestyle-led architecture and interiors that feel effortless, refined, and deeply personal. Every new project still gives me butterflies - there's something so special about hearing someone's vision and imagining the life they'll live within the spaces we design together.

I grew up in Switzerland, spent my twenties travelling the world and working in the performing arts - a chapter that continues to shape my creative lens. My work draws from global architecture, art, movement, culture and nature, and I'm passionate about designing spaces that are both beautifully elevated and genuinely lived in.

Today, my husband Gal and I run our design studio together in Brisbane, where we live with our two daughters, Arielle (10) and Avi(8). With Gal leading sourcing, procurement and our custom furniture line, our studio brings a holistic approach to every project - from the first idea to the final installation.

As a designer, a mother and a business owner, I deeply understand the rhythms of a busy life, and the importance of a

home that supports and inspires you. It's a privilege to help families and visionaries create environments that not only look exceptional, but enhance the way they live every day.
